PLAYLISTCONNECT

Kalipso Gx

The Kalipso Gx tablet media player presents the user with an engaging full color display. In addition to showing album art, song title and artist information, the Kalipso Gx also allows touchscreen navigation for program selections, systems settings, and optional program mix. The Kalipso Gx is configured with the proprietary Kalipso Audio application which manages all scheduling and playback of stored audio. This player-side application compliments the server-side software of Westport Solutions' highly capable audio content management system. Designed to be engaging and user-friendly.

- **Music and Messaging**
